ARTICLES.

Author.	Title.	Page.
V. G. Cavallaro.	On Lemoine's ellipse.	266
J. C. Cooke.	Some nomograms for the pilot navigator.	11
A. R. Curtis, J. G. L. Michel and E. D. Sully.	Central projection and stereoscopic diagrams on the differential analyser. *See also* W. W. O. Slessenger.	276
H. Davenport.	Study and research in mathematics.	161
H. M. Finucan.	Some results in the theory of mass systems.	19
R. L. Goodstein.	On the multiplication of series.	16
D. R. Hartree.	Automatic calculating machines.	241
S. Inman.	The probability of a given error being exceeded in approximate computation.	99
J. C. Jaeger.	Demonstration apparatus in the teaching of applied mathematics.	166
J. Leech.	Some properties of the isosceles tetrahedron.	269
A. Liebetegger.	The problem of the swing. I.	84
D. E. Littlewood.	Applicability and the teaching of geometry.	272
R. H. Macmillan.	The freedom of linkages.	26
J. G. L. Michel.	*See* A. R. Curtis.	

Author.	Title.	Page.
M. J. Moore.	A simple test for the reality and sign of the roots of two determinantal equations of high degree.	94
F. H. Northover.	The problem of the swing. II.	86
K. Sarginson.	An operational method for determining the series solution of a linear differential equation of rank two.	8
W. W. O. Slessenger and A. R. Curtis.	A very short history of mathematics.	82
E. D. Sully.	*See* A. R. Curtis.	
B. A. Swinden.	Geometry and Girard Desargues.	253
B. Thwaites.	The problem of the swing. III.	89
C. O. Tuckey.	Variety in tangents and normals.	261
N. Y. Wilson.	The general isogonal circle.	281
Mathematics in the comprehensive school.	F. J. Swan (p. 182); Y. Giuseppi (p. 188); M. W. Brown (p. 191); D. Levin (p. 193); K. B. Swaine (p. 193); C. T. Daltry (p. 193); A. W. Riley (p. 194); J. H. Burdon (p. 195); Y. Giuseppi (p. 196); F. J. Swan (p. 196).	182
The teaching of mechanics.	K. S. Snell (p. 168); E. A. Baggott (p. 171); L. E. Hardcastle (p. 173); A. W. Siddons (p. 174); R. H. Cobb (p. 175); W. F. Bushell (p. 175); L. W. Clarke (p. 176); H. V. Lowry (p. 177); P. J. Wallis (p. 177); T. A. Brown (p. 177); A. Robson (p. 178); H. M. Cook (p. 179); A. J. Sampson (p. 179); A. W. Siddons (p. 179); V. I. Todhunter (p. 179); J. T. Combridge (p. 180); K. S. Snell (p. 180).	168
Annual Meeting of the Mathematical Association, 1950.		2
Report of the Council for 1949.		2
Report of the Teaching Committee.		5
"The teaching of mechanics in schools" and other reports.		198
Mathematical Colloquium, Oxford, 1950.		7

MATHEMATICAL NOTES.

Author.	No.	Title.	Page.
G. Allman.	2187	On Note 2070: the equation $U_1^2S - 2U_1US_1 + U^2S_{11} = 0$.	305
M. Appleby.	2122	The centre of gravity of a trapezium.	57
A. P. Bailey.	2171	A problem in solid geometry.	289
A. Buckley.	2185	Riccati's differential equation.	304
G. A. Bull and E. Knighting.	2142	A property of bi-variate normal distributions.	127
E. J. Burr.	2182	Conditions for a developable surface.	300
I. B. Butterworth.	2181	Infinite oscillation of alternating series.	298
T. W. Chaundy	2166	On the formula of the mean.	219
J. C. Cooke.	2162	Something beginning with a "B".	214
J. L. B. Cooper.	2177	The triple vector product.	296
N. J. F. Craig.	2111	A geometrical converse.	44

Author.	No.	Title.	Page.
H. J. Curnow.	2156	A property of the quadrilateral and the construction of a quadrilateral to satisfy certain conditions.	205
J. T. Davies.	2107	On Note 1957.	39
G. A. Dirac.	2186	Sylvester's law of nullity.	305
R. G. Everitt.	2151	Corollaries to the " chord and tangent " theorem.	200
H. M. Finucan.	2131	The three classes of lever and a family of mnemonics.	114
H. G. Forder.	2126	Illustrations in the use of crosses.	62
	2127	Lemoyne's theorem.	65
	2128	Three short proofs.	67
	2129	Algebraical identities.	69
	2169	The theorem of v. Staudt and Clausen.	286
	2170	The use of vectors for finding OH^2, OI^2.	289
F. M. Goldner.	2163	Inequalities in the triangle.	214
J. Hadamard.	2158	On differentials.	210
K. A. Hirsch.	2134	On the generalised Vandermonde determinant.	118
E. J. Hopkins.	2144	Some theorems on concurrence and collinearity.	129
V. Inglada.	2149	A criterion for convergence of series and its applications.	138
T. Totradi Iyengar.	2180	Note on Spearman's rank-correlation coefficient ρ.	298
F. Jackson.	2168	The circular functions for all angles.	286
O. G. Jones.	2160	The fundamental theorem of arithmetic.	212
R. Kitchen and M. J. Moroney.	2108	The reciprocal nomogram.	41
E. Knighting.		*See* G. A. Bull.	
C. D. Langford.	2110	Addition to Note 1558, " Rate of work " problems.	44
	2143	Mental multiplication.	129
D. F. Lawden.	2167	Pan-magic squares of even order.	220
H. V. Lowry.	2109	Curves of constant diameter.	43
A. M. MacBeath.	2138	Rational plane quintics with three cusps.	123
M. A. MacConaill.	2164	The catenary as a " simple " curve.	215
H. V. Mallison.	2172	One-one correspondence.	292
	2173	Three converses.	293
D. E. Mansfield.	2105	The distribution of the primes.	38
E. A. Maxwell.	2120	Every spherical triangle is isosceles.	55
	2121	That every angle is a right angle.	56
S. Minetti.	2184	On the operation of derivation.	303
M. J. Moroney.		*See* R. Kitchen.	
E. H. Neville.	2130	Iterative determination of a familiar particular integral.	70
	2133	Notes on conics: 13. The pedal property of the auxiliary circle.	118
	2154	The equation of a Pascal line.	203
S. Parameswaran.	2140	On division by $(\alpha)_k$.	125
R. H. Peacock.	2106	Note on solution of triangles.	39
	2124	The new ball in cricket.	58
D. A. Quadling.	2137	On the principle of proportional parts.	122
C. T. Rajagopal.	2139	On converse theorems of summability: addendum.	125

Author.	No.	Title.	Page.
Yuan-Jen Roan.	2132	The prime line.	115
S. Rushton.	2183	On sub-factorial n.	302
L. R. Shenton.	2145	A note on compound determinants.	133
	2178	A note on Whittaker's solution of an algebraic equation.	297
T. K. Smith.	2136	Proofs of isosceles triangle theorems.	121
W. Snowdon.	2119	The line $x+y=0$ as the line at infinity.	52
A. K. Srinivasan.	2118	On Menelaus' theorem, Ceva's theorem and the harmonic property of the quadrilateral.	51
A. Steiner.	2113	On Note 2002.	45
	2114	The Brocard angle.	46
J. W. Stewart.	2175	Algebra and the child.	294
A. G. Stripp.	2123	Two corrections.	58
B. A. Swinden.	2135	Tests for divisibility.	120
	2141	Some series for log 2.	126
	2150	Some theorems on the parabola.	139
	2161	On Note 2018.	213
E. D. Tagg.	2125	Scale drawing and the LBW rule in cricket.	60
V. Thébault.	2146	Sur le théorème de Feuerbach.	135
	2147	Nombres premiers en progression arithmétique.	136
	2148	Sur l'orthopôle.	136
	2157	Sur certains polygones inscriptibles.	208
A. J. J. Thomas.	2112	The circle squared!	45
C. O. Tuckey.	2115	The definition of pole and polar.	47
	2116	Variations on a very simple theme.	48
	2117	Variations on an examination question.	50
	2152	Use of table of chords.	201
	2153	A neglected proof.	202
G. Tyson.	2174	Rational common tangents.	294
S. Vajda.	2159	Some summation formulae for binomial coefficients.	211
J. D. Weston.	2165	Transformations of matrices with zero trace.	217
G. J. Whitrow.	2176	On the vector triple product formula.	295
A. E. Williams.	2155	Sign convention and rotation.	205
S. K. Zaremba.	2179	A geometric proof of an algebraic identity.	298

REVIEWS AND NOTICES.

Author.	Title.	Reviewer.	Page.
